## **We are committed to sustainability**

### **We use district heating for our hotel**

Due to simultaneous production of heat and electricity, combined heat and power plants, district heating is very energy-efficient. By implementing renewable energy sources and utilizing waste heat generated by industry, the environmental gain by district heating is further evident. This kind of energy utilization is beneficial for both environment and society in general.

### **Food Save – Together against food waste**

290000 tons of avoidable food waste arises in Switzerland in the entire value chain of the out-of-house consumption by year. Remains lying on plates or buffets and overproduction account for approximately 70 percent of all the losses. (Source: BAFU) That is why we also strive every day to reduce food waste in our house.

### **We're not using any chemicals for our nature pond**

For conventional swimming pools, the use of chemical additives is essential. This is not necessary with nature pools. Allergic people do not have to fear skin or eye irritations and can therefore enjoy the refreshing cold and the appealing ambience of a swimming pond with all their senses - and preferably every day! Of course, a natural pool must also be maintained and regularly cleaned in order to maintain a stable water biology.

### **We use local suppliers from the Bernese Oberland**

We save ourselves the CO<sub>2</sub> output caused by long transport routes with airplanes as well as trucks. We rely on regional companies and farms as well as our own herb garden! Here are some examples:

- Die Blaue Kuh Metzgerei, Matten b. Interlaken – local butchery
- Rugenbräu, Matten b. Interlaken – local beverage supplier as well as local brewer
- Weinhandlung Ritschard AG, Interlaken – local wine dealer and manufacturer
- H&R Gastro Interlaken – local food and beverage supplier for large quantities
- Bäckerei Konditorei Confiserie Mohler, Unterseen – local bakery and confectionary
- Gourmador, Unterseen – local fruit and vegetable vendors
- Rosmarie Balmer, Alpkäse, Wilderswil – local cheese producer

**In this way, you can make your contribution to sustainability and the environment:**

 A photograph showing a hand with the index finger pointing at and pressing a white light switch on a wall. The switch is a standard toggle switch.	<p>If you leave your room, please turn off all the lights to save energy.</p>
 A photograph showing a hand with the thumb and index finger turning a chrome faucet handle. Water is visible flowing from the faucet.	<p>Please turn off the water as soon as you have finished.</p>
 A green and white sign with the text 'LOVE FOOD' in large, bold, green letters. The letter 'O' in 'LOVE' is replaced by a green outline of an apple. Below it, in smaller green text, is 'Don't waste it.' In the top right corner, there is a small copyright notice '© REEF'.	<p>Please only grab as much food as you are going to eat.</p>
